

COMFORT Udder Care

HEALTHY UDDERS GIVE MORE MILK!

Udder Care Green Spray

- Treatment of the entire udder or per quarter.
- Treat hard quarters for 4 days, 2x a day.
- Treat the complete udder around the udder twice a day for 4 days around birth calfs.
- Udder Care yellow has a natural color and is suitable for treatment of wounds. The color disappears after about 20 seconds.
- Udder Care green has natural ingredients, but the natural dye gives a green marking of treated udders. This marking is visible until the next milking.
- Udder Care consists of essential oils and natural additives.

- Less edema
- Less mastitis
- Less antibiotics
- Lower SCC
- Better milk letdown
- No withhold period

TIP

WHEN TREATING LARGER NUMBERS

Udder Care is easy to apply with the robust Comfort Udder Sprayer. This 10 liter sprayer works on a rechargeable battery. With the special pre-assembled spray head, it is possible to quickly treat a quarter or full udder.
