

COMFORT Udder Care

HEALTHY UDDERS GROW HEALTHY PIGLETS!

- Less edema • Less mastitis • Less antibiotics
- More milk around the birth of piglets
- Fewer diarrhea piglets • Better teat quality

HEALTHY UDDERS MAKE MORE MILK!

Udder Care Green Spray

- Treatment of the whole udders.
- Spray Udder Care with the comfort sprayer in a forward motion, 1 x per udder. Start at the back of the udders.
- Starting on day 110 of gestation through 114 days of gestation.
- Spray the entire udders for 4 days 2 x per day.
- Udder Care green has natural ingredients, but the natural dye gives a green marking of treated udders.
- Udder Care consists of essential oils and natural additives.
- Before applying Udder Care, make sure the udders are clean, this will allow the skin to absorb the product effectively and you will need less product for optimal results.

TIP

WHEN TREATING LARGER NUMBERS

Udder Care is easy to apply with the robust Comfort Udder Sprayer. This 10 liter sprayer works on a rechargeable battery. With the special pre-assembled spray head, it is possible to quickly treat a udder. Treat hard udders or sections for care during lactation.
