

COMBATING CRYPTOSPORIDIUM

Combat Cryptosporidium on your farm and protect calves with Crypto-Syn and Ampho-Tec. This 2-Step disinfection protocol is designed specifically to target and kill cryptosporidium.

Cryptosporidium is a parasite of the intestinal tract. In many farms it is a serious issue for cows, and in particular newborn calves. Symptoms of infection include diarrhea, loss of appetite and lethargy. In many farms, diarrhea is the most common cause of death in newborn calves.

CRYPTO-SYN PRE-DISINFECTANT

Crypto-Syn is a concentrated foaming pre-disinfectant that breaks down and removes biofilm, making way for the disinfectant to come in and kill the bacteria. Apply with foaming lance, allow to soak for at least 20 minutes and then rinse.

SPECIFICATIONS	
Colour	Yellow
Suitability for	Calf huts, sheds & high-soiling areas
Foaming	High + superior clinging capability
Targets	Bacteria-containing biofilm
Dilution Rate	1:20 or 5%

AMPHO-TEC DISINFECTANT

Ampho-Tec is a concentrated disinfection that targets and kills cryptosporidium and other pathogens. Allow for a contact time for 30 minutes - with no requirement to rinse off. Ampho-Tec is a highly effective solution which is also environmentally friendly and fully biodegradable.

SPECIFICATIONS	
Colour	Vibrant Red
Suitability for	Calf huts, sheds & high-soiling areas
Foaming	High + superior clinging capability
Versatility	Apply with foaming lance or sprayer
Targets	Cryptosporidium + other pathogens
Dilution Rate	1:15 or 6.5%
